WORK EXPERIENCE

Backend Engineer
CyberMe Studios and Trusted Partner

Sept 2022 - Nov 2022
Remote - Saudi Arabia

-
- Developed a cyber security Network Vulnerability Scanning SaaS application.
 - Participated in code reviews and writing of automated test cases.
 - Developed fast and secure API's for product features.

Working as the Backend Engineer on the team, I take part in project architectural designs and backend API implementations. I am responsible for a number of microservices and I work with the team to deliver high end products for the company.

My responsibilities include:

- Working with the Software Architect to provide a good base architecture for our products.
- Relate with Product designers and Front end engineers regarding product features.
- Developing fast and secure API's for product features.
- Preparing API documentation for product API's.

My responsibilities include:

- Developing automated business workflow engines to facilitate and optimize business processes.

-
- I analyze business data in order to generate quality insights by making use of the python data science libraries, and also communicate these insights through KPI dashboards and excellent data reports for business clients.

EDUCATION

Bachelor of Medical Laboratory
Science (B.MLS)
Niger Delta University

Wilberforce Island,
Nigeria.
2012 - 2018
